DETAILED ACTION

Allowable Subject Matter

Claims 2-11, 13-15 and 17-20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 2-4 and 6-8, each claim states the limitation "a first opposite edge of the first center conductor; a second opposite edge of the second center conductor; and a second bond wire coupled to the first opposite edge with a third bond and to the second opposite edge with a fourth bond". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by, the prior art.

Claim 5 states the limitation "wherein the distance between the first intermediate bond and the second bond is smaller than the distance between the first ball bond and the second bond". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by, the prior art.

Claim 9 states the limitation "wherein the first conductive region is a first ground plane of a first co-planar transmission line and the second conductive region is a second ground plane of a second co-planar transmission line. This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by, the prior art.

Claim 10 states the limitation "wherein the first planar transmission device is a first slot line and the second planar transmission device is a second slot line". This

limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by, the prior art.

Claim 11 states the limitation "further comprising a second bond wire coupled to an opposite edge of the first conductive region with a third bond and to the second conductive region with a fourth bond. This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by, the prior art.

Regarding claims 13-15 and 17-20, claim 17 states the limitation "a second bond wire coupled to the second edge with at least a second ball bond and to the component with a second end bond, wherein the first intermediate bond is closer to the first edge than the first ball bond". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by, the prior art.
